

CEILING SUSPENSION SYSTEMS

A range of precision-engineered ceiling suspension systems, including chiller and freezer options, offering strength, clean aesthetics, and hidden-fixing solutions for seamless, hygienic, and visually refined installations.

PUREVER
UK

The Company

Purever UK are one of the leading manufacturers of cold rooms, cold room shelving, and clean rooms, as well as a wide range of commercial and industrial doors and insulated composite panels. Based in South Wales, Purever UK has grown to occupy a manufacturing area of almost 4,000m² since 2009, becoming Purever UK Ltd in 2014.

The Group

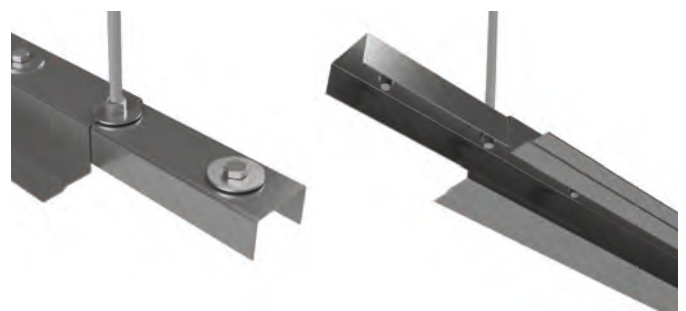

Purever UK is part of Purever, a leading international group in the design and manufacture of premium thermal insulation solutions, with more than 70 years of history and a presence in more than 70 countries.

PUREVER

Purever's objective is to leverage its technologies, industrial know-how and project experience to provide its customers with the best quality products, delivered with the highest levels of service. Purever Industries is committed to the development of a new generation of products, which are innovative, eco-sustainable, modular, easy to use and interactive with customer applications.

Ceiling Suspension Systems

Purever UK has introduced a range of precision-engineered ceiling suspension systems, including chiller and freezer options. Built on major investment in advanced flashings manufacturing, the range offers strength, clean aesthetics, and hidden-fixing solutions with joggled cover strips for seamless, hygienic, and visually refined installations.

Next Generation Ceiling Suspension Systems

Purever UK is proud to be able to manufacture and supply complete Ceiling Suspension Systems. This is one of the first product ranges to emerge from a major investment in next generation metal sheet manufacturing. This strategic expansion strengthens UK production capabilities, enhances quality control, and enables fully engineered solutions tailored to the needs of modern controlled environment construction.

Our ceiling support portfolio brings together precision engineered performance, clean aesthetics, and installation efficiency. Our Ceiling Suspension Systems are ideal for cold rooms, food processing facilities, cleanrooms, and hygienic industrial environments. As with our entire product range, the Ceiling Suspension Systems reflect the reliability, structural integrity, and long term durability expected from Purever products.

Systems

At the core of this range is our **PCS100 System**. **Designed for use in chilled spaces**, it is manufactured in high quality galvanised steel, with a white Foodsafe Laminate cover strip that encloses the top hat and fixings. This system provides the stability and performance required whilst delivering a clean, seamless finish that conceals fixings and enhances hygiene and visual appeal.

The **PCS200 System** can be used in freezer environments. It features a top that sits proud of the ceiling panels. Strong, adaptable and versatile, this system provides dependable support for ceiling panels while offering compatibility with a wide variety of room configurations and environmental conditions.

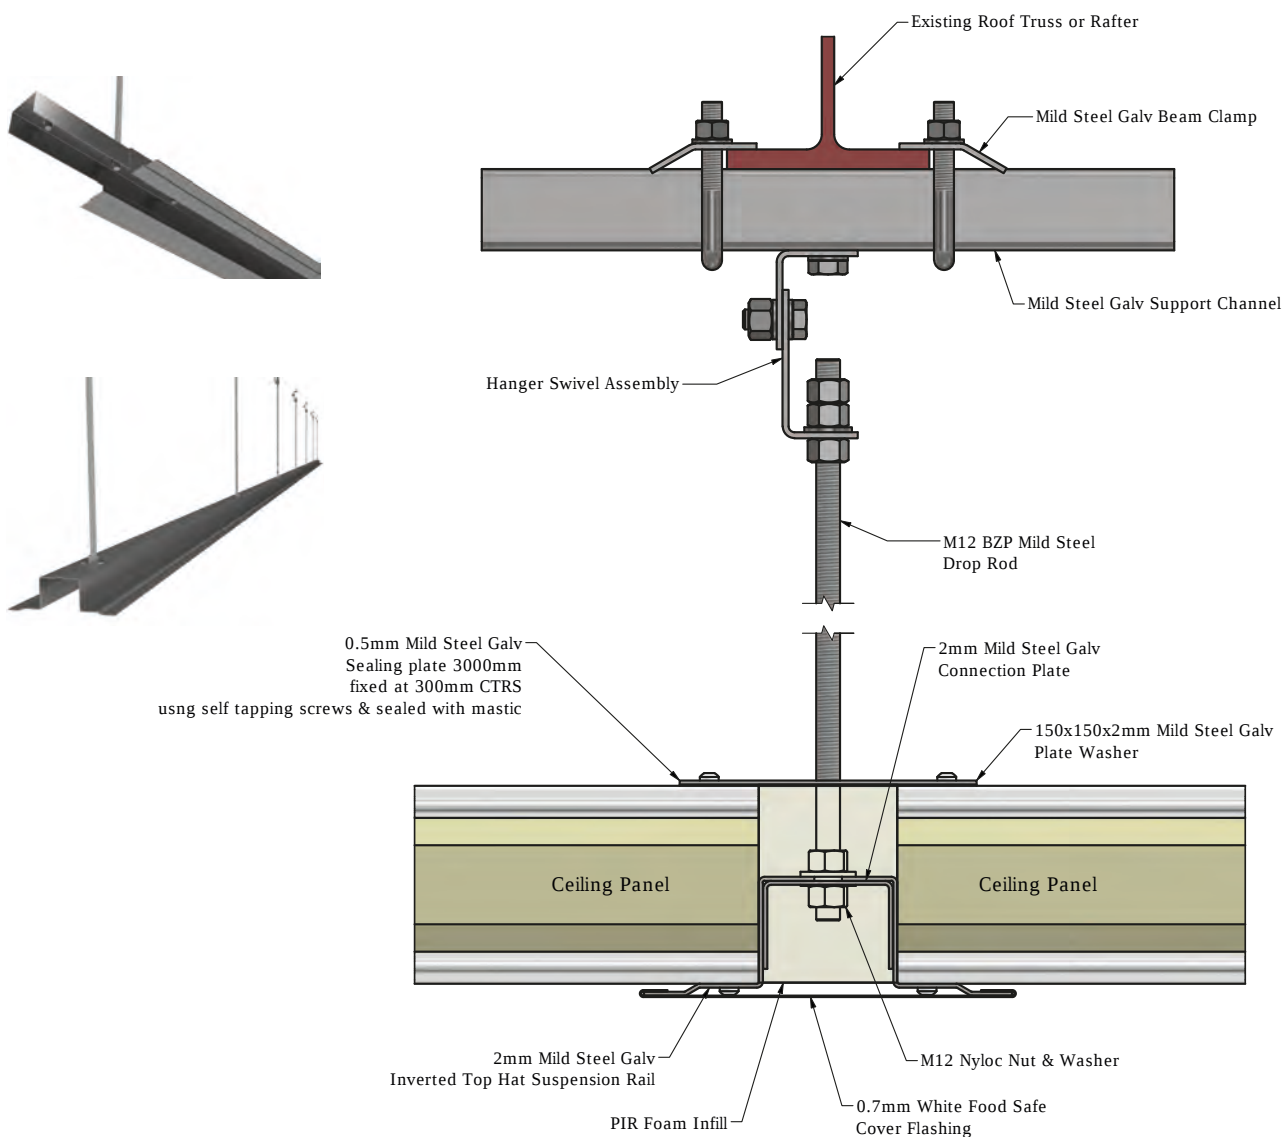

Both ceiling suspension assemblies provide a sturdy, attractive finish and are compatible with a choice of straight or swivel hanger systems, which allows for convenient installation and precise alignment. The hanger and support systems provide the finish and function that is essential for premium environments where appearance and cleanliness matter just as much as performance.

Strength, Precision and Aesthetic Excellence - Made in the UK

Ceiling Suspension Systems reflect the benefits of Purever UK's expanded flashings manufacturing capabilities: tighter tolerances, enhanced durability, and the ability to respond rapidly to customer specifications. With increased in-house capacity and improved production efficiencies, ceiling suspension solutions are now available that are not only structurally robust but also visually refined.

Whether the priority is simplicity, strength, or sophisticated concealment, Purever UK now offers Ceiling Suspension Systems to meet the demands of today's most technical environments.

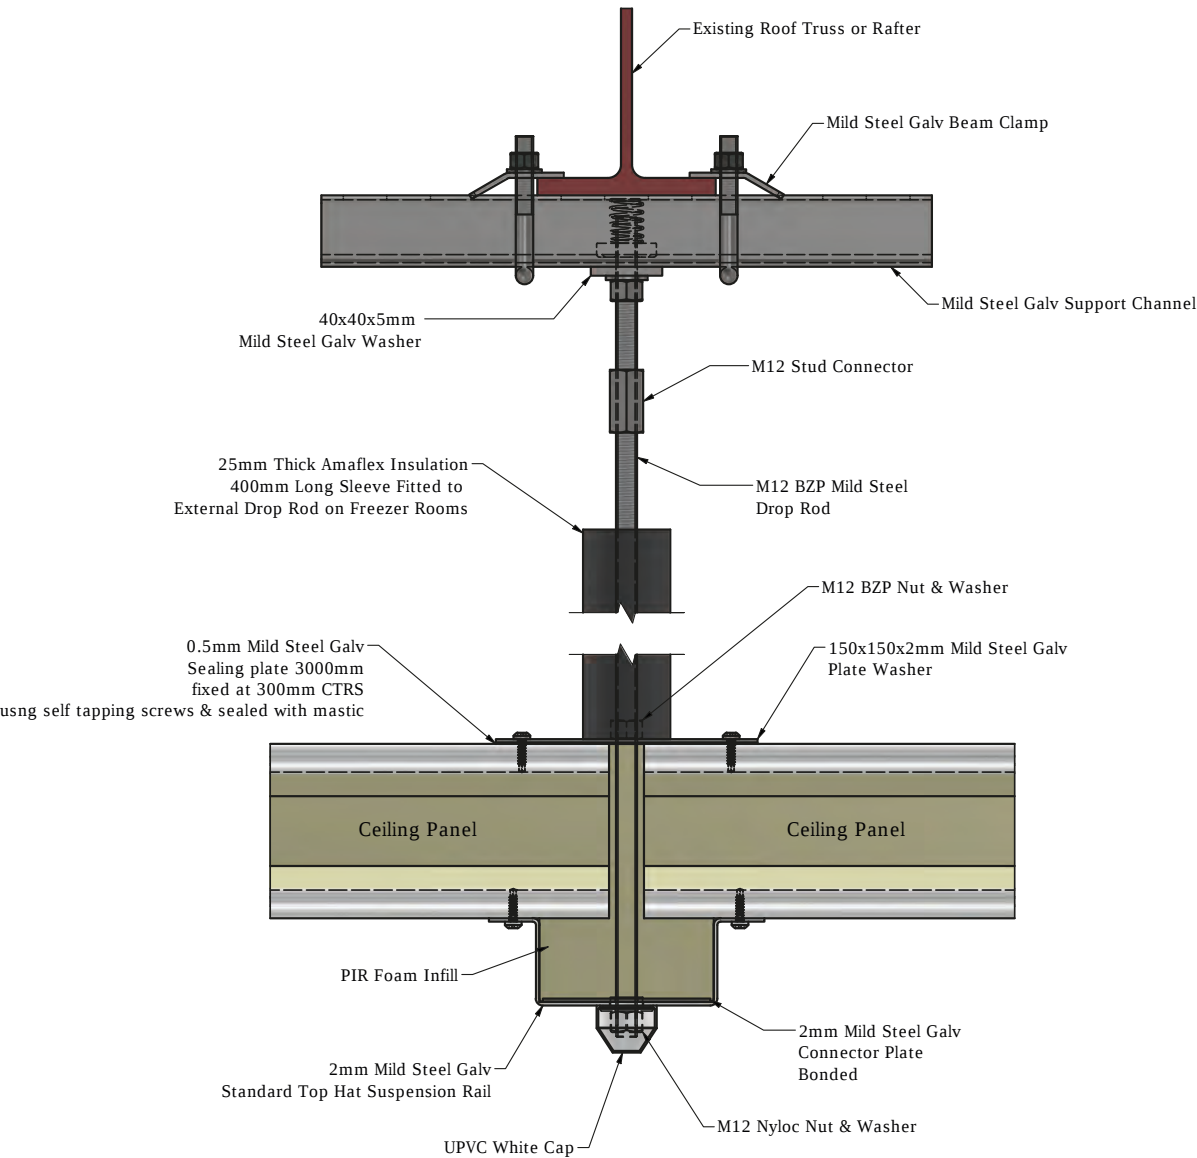

Support System	PCS100
Hanger System	PHS100

Specifications	
Material	2mm Galvanised Steel
Finish	Plain Mill
Suspension	3 Points @1650mm Centres
Options	Cover Strip to hide fixings
Features	Strengthening connector pieces and bottom assembly fixings in place
Typical Application	Chiller
Hanger System	PHS100 (swivel) or PHS200 (straight)

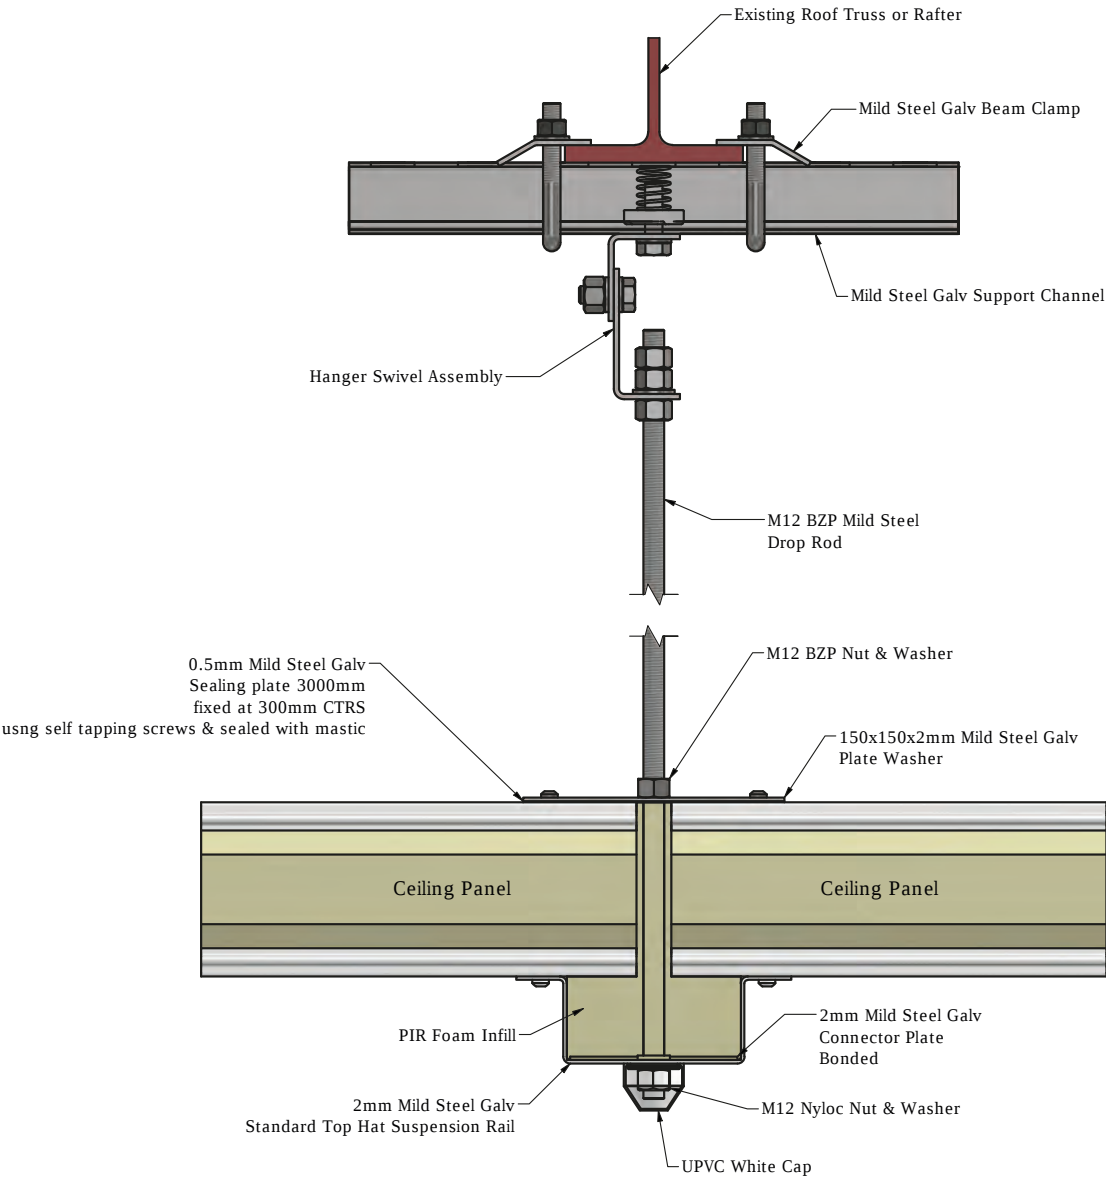

Support System	PCS200
Hanger System	PHS200

Specifications	
Material	2mm Galvanised Steel
Finish	Plain Mill
	Polyester Power Coated (RAL 9003 as standard)
Suspension	3 Points @1500mm Centres
Typical Application	Freezer
Hanger System	PHS100 (swivel) or PHS200 (straight)

Support System	PCS200
Hanger System	PHS100

Specifications	
Material	2mm Galvanised Steel
Finish	Plain Mill
	Polyester Power Coated (RAL 9003 as standard)
Suspension	3 Points @1500mm Centres
Typical Application	Freezer
Hanger System	PHS100 (swivel) or PHS200 (straight)

Standard Flashing Details

Specifications

Committed to the Environment and Sustainability

Conducting business in an environmentally and socially responsible manner is a priority at Purever UK. Protecting and preserving the environment for current and future generations is a key focus for the business. The principles for integrating sustainable practices throughout our operations include:

1. **Environmental Stewardship:** conserving resources, minimizing waste, and preventing pollution.
2. **Sustainable Resource Management:** optimizing the use of energy, water, and raw materials.
3. **Climate Change Mitigation:** minimize the company's carbon footprint and implement measures to increase energy efficiency.
4. **Circular Economy:** embrace the principles of the circular economy by promoting product durability, repairability, and recyclability.
5. **Biodiversity and Ecosystem Protection:** take measures to protect and enhance biodiversity and ecosystems in our operations.
6. **Supplier and Partner Engagement:** collaborate with our suppliers and business partners to promote sustainable practices throughout the supply chain.
7. **Social Responsibility:** sustainability extends beyond environmental considerations and includes social responsibility. Purever UK is committed to fair and ethical business practices, promoting diversity and inclusion, respecting human rights, and ensuring the health and safety of our employees and stakeholders.
8. **Continuous Improvement:** strive to evaluate and improve environmental and sustainability performance, where possible fostering a culture of innovation and learning to drive sustainable practices throughout our organization.

Cold Room Panels

PIR Insulated panels provide the next generation in thermal performance and fire resistance.

COLDKIT

Modular cold rooms for cold storage solutions required by hotels, restaurants, catering companies, food trade and commercial kitchens, plus non-food applications such as mortuaries.

Robust, hygienic and long lasting shelving and storage solutions with high capacity. Fully modular and adaptable to any configuration with the ability to operate at temperatures from -40°C to + 80 °C

Globally renowned clean room technology, available manufactured in the UK from 2024. Drawing on over 60 years of experience developing and manufacturing cleanroom envelope solutions

The widest range of commercial and industrial doors in the UK, featuring service, impact, high speed, automatic, insulated and sliding doors; or a combination of the above.
